

Impact Rated Magnetic Roofing Bolt Driver

RANGE

Description	Diameter	Length	Part Number
50mm Impact Rated Roofing Bolt Driver	14mm (for most 6mm thread bolts)	50mm	TWGBDX
100mm Impact Rated Roofing Bolt Driver	14mm (for most 6mm thread bolts)	100mm	TWGBDX100

USER INSTRUCTIONS

- 14mm diameter (for most 6mm thread bolts). 1/4" Hex drive.
- Available in 50mm or 100mm lengths.
- Ensure a positive location between the screw head and the driver before actuating the power tool.
- When using, it is good practice to part assemble the components by hand first before actuating the power tool. This reduces the risk of cross-threading.
- Periodically check the magnet for metal chippings etc. These should be removed so as not to interfere with the positive drive between the screw head and driver.

1/4" quick-change shank
