Product Description

6mm Spiral Binding Kit Black 10m Long

The CABAC range of spiral binding is a versatile, simple to install cable management system designed to tidy and protect cables and wires. The product wraps around the cable bundle to create neat looms that help to guard against abrasion and other damage. The spiral wrap-around design makes it easy to separate one or more cables from the bundle, allowing for wire breakouts at any point along the length of the loom.

Spiral cable binding is user-friendly, flexible and adjustable, with each size adapting to fit bundle diameters within its considerable expansion range. Reels are supplied in convenient cardboard dispenser boxes, and can be cut down to suit the precise length required for the job. This option is more economical than short runs and results in less product wasted.

Our black spiral binding contains 2% carbon black for UV stability and as such it is suitable for outdoor applications.

Product Dimensions

ID Minimum: 5mm

ID Maximum: 12mm

Kit Qty: 10m

Our 6mm spiral cable wrap is also available in a convenient dispenser box of 50 metres for larger jobs, refer part number SBK6BK.

Not the size you need? We have a wide variety of sizes and reel lengths available. Refer to the product datasheet for a full list of options.

Technical Data

Material: Alkathene low-density polyethylene

Maximum Operating Temperature: 70 degrees Celsius

UV Stability: Good (2% carbon black)
