

DT1916-QZ

Aluminium Cutting Circular Saw Blade 305mm 80T

The range of metal cutting blades are optimised for cutting steel, aluminium or stainless steel. Through a proprietary in-house process tooth alignment has reached a level to give a smooth accurate cut, minimising vibration and burring. 305mm 80T

Selling Propositions

- Backed by an ultra-thin kerf blade for fast cutting and helps to increased battery life, DeWalt MetalCutting saw blades are built to power through aluminium and non-ferrous metals, including brass and copper
- Heavy-duty tungsten carbide tips maintain a sharp edge for long life, and an anti-stick rim helps to reduce friction and gum-up

Standard Equipment

Specifications	
Diameter	305.0 mm
Bore Size	30.0 mm
Plate Thickness	2.5 mm
Kerf Thickness	3.2 mm
Tooth Count	80.0
Grind	Triple Chip Grind
Rake Angle	-5 °
Performance Level	Standard
Pack Quantity	1.0
Tooth Direction	Clockwise
Application Material	Multi
