

DT1963-QZ

Construction Circular Saw Blade - 3 Piece Set

Construction saw blades are suitable for first fix application where cut finish is less important and re-used timbers are often used. Teeth on these blades are designed to resist damage should they impact foreign objects such as embedded nails and concrete.

Selling Propositions

- Extremely robust, nail-resistant construction saw blades for the toughest requirements
- Designed for use on stationary circular saws for cutting natural woods and composite materials such as formwork, they enable simple to good lateral and longitudinal cutting results
