

## SECURE MAINS SAFETY ISOLATOR - SURFACE RED

### Introduction

This product provides a secure method of Safety Isolation of the AC mains supply for fire alarm equipment as per BS 5839Pt.1.

Installation must be carried out by a skilled electrician who is familiar with the appropriate standards and technical requirements of the appliance.

Both the Live and Neutral supply is switched.

The key switch should only be used by an authorised person.

The key is removable in both ON/OFF position.

A Green LED is used to indicate AC mains supply present at the switched output.

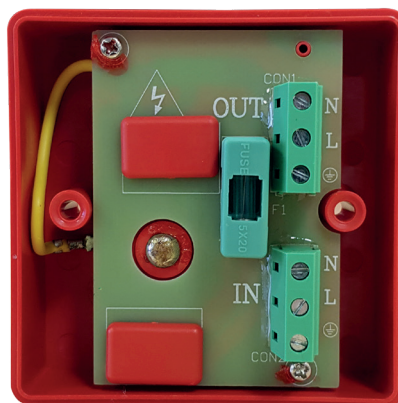

An internal fuse is also provided for protection.

The unit is supplied with a surface back box. If the unit is to be semi-flushed then a recommended 35mm single back box will be required.
