

NEXT GENERATION OF TOTAL CONTROL

TOTAL CONTROL

STUDENT ACCOMMODATION

COMPLETE HEATING SOLUTIONS ISSUE 2

The Heatstore Total Control Heater (HSP-WIFI), is the first heater within the Heatstore range that can be connected directly to Wi-Fi through our Heatstore Total Control App, allowing total control of your heating system remotely. The app is completely free to use and can be downloaded from the Google Play or Apple Store. It provides users with the same control features as the digital control panel on the heater and is very simple to set up. With the app, users can configure the settings of all connected heaters and view energy usage in the last day, week, month, and year.

Allows premises owners to significantly reduce their energy usage and running cost of their property through total heating control.

HEATSTORE TOTAL CONTROL APP

Heatstore Total Control App – Main Features:

- Direct Wi-Fi control via free of charge Wi-Fi Total Connect App – The Heatstore Total Control App is easy to use and offers direct control of individual HSP-WIFI heaters, as well as the option to group heaters into zones. Taking only a few seconds to pair with each heater, once done, you can assign each heater a name and take control from the Total Control App.
- Energy consumption monitor – Utilising the energy consumption function within the Heatstore Total Control App, allows accurate monitoring and analyse of each heater's energy usage daily, weekly, monthly, and yearly. From this, the heaters programming setting can be adjusted through the Total Control App to achieve the heater optimum performance levels.
- quickly detect their HSP-WIFI heaters and connect them to the Total Control App. Further, users can group a series of heaters.
