

Valencia Traditional TRV

The Valencia valve and matching lockshield valve uses the stylish manual body to ensure there is a common look and feel in all situations where you need an electronic, a classic or a traditional TRV or a manual valve.

- A-rated energy saving performance
- Liquid sensor provides consistent and long-lasting performance
- Bi-directional flow valves – fit to either end of radiator with no need to change valve flow direction after installation
- Sensor head may be mounted vertically or horizontally by using the interchangeable radiator tail and copper tube fittings
- Set and forget integrated balancing insert reduces risk of call back
- 6 mm play on radiator tail piece to allow for variation in radiator distance from valve
- Easy grip, non-slip TRV head design
- Energy-saving button alerts user to the economical setting for comfort
- The insert can be removed and replaced without draining down using a special tool.

Valencia Manual Radiator Valve Pack

Using the Valencia Manual Radiator Valve Pack ensures you can visually match with our electronic, traditional and classic TRV heads. The Manual Valve allows the user to switch the radiator on/off, and the lockshield valve limits water flow through individual radiators in wet central heating systems. The valves can be mounted vertically or horizontally at either end of a radiator.

- Bi-directional flow design
- Positive shut off
- The insert can be removed and replaced without draining down using a special tool.
