

Valencia TRV features

- Liquid-filled temperature measurement allows faster reaction to temperature changes
- Integrated balancing insert ensures easy efficient system balancing
- Can be mounted vertically or horizontally
- 'A' rated for efficiency

- Setting measurement provides visual reference of setting points
- Unobtrusive, stylish design
- Replacement heads with different finishes available for all our TRVs
- TRV heads will also fit Valencia manual valve bodies as well as other standard non-Honeywell-Home TRVs (an adaptor may be required)
- Stylish fluted body used with the Classic, Traditional and matching manual valves will also fit a wide range of other Honeywell Home TRV heads including **evohome** Radiator Controllers

Valencia Classic TRV

The Classic TRV senses the air temperature around it and can limit room temperature by regulating individual radiator output in wet central heating systems. Mounted on the matching Valencia valve body, this TRV can be visually matched with any other Honeywell Home TRV.

- A-rated energy-saving performance
- Bi-directional flow valves – fit to either end of radiator with no need to change valve flow direction after installation
- Liquid sensor provides consistent and long-lasting performance
- Sensor head may be mounted vertically or horizontally by using the interchangeable radiator tail and copper tube fittings
- Set and forget integrated balancing insert reduces risk of call back
- Classic good looks designed to appeal to homeowners
- The insert can be removed and replaced without draining down using a special tool
- 6 mm play on radiator tail piece to allow for variation in radiator distance from valve.

VT200-15A	Classic TRV 15 mm Angled Body
