

*Hit it and run... for less!*

**Please meet SITE ALERT, the new member of the Howler family.**

He looks and sounds a bit different to his big brothers, but you'll quickly discover that he has all the family characteristics - reliable, simple and tough.

Designed for smaller sites, and smaller budgets, this little guy really means business.

Up to 20 units can be linked together, and with voices of 100dB at 1 metre, you'll find them difficult to ignore when they get going.
