

Rtr B. S1/2" Straight 2C 12.7/108mm - 4 pc STRAIGHT BITS

- Cobalt infused micro grain tungsten carbide for best durability and lifetime, thicker carbide so suitable for multiple resharpenings.
- Carbide is brazed onto the body using a triple layer process (silver-copper-silver) to give the strongest bond.
- Multi axis CNC grinding process produces a ultra sharp cutting edge geometry for best edge retention - Stays Sharper Longer.
- Anti-friction coating reduces binding, friction and heat build up for cooler cuts; it also protects the bit against corrosion and accumulation of resin.
- Anti-Kickback Shoulder controls depth of cut and minimises kickback.
- 2 carbide edges ensure clean, smooth and precise grooves or slots in soft/hard woods, MDF, plastic coated boards, plywood, plastics and composites. Bits from 3-8mm diameter are solid carbide for better durability and lifetime.
- With bottom cutting edge making them ideal for plunge cuts.
- On small diameters as well as long router bits make multiple shallow passes to prevent damaging the bit.
- Ref. 4932501169 is supplied with an extra carbide cutting edge at the tip for better performance and lifetime.

∅ (mm)	12.7
Article Number	4932501050
Materials suited for	Wood
Pack quantity	4
Shank diameter [in]	1/2"
Total length (mm)	108
Working length (mm)	50.8
