

Large Bullnose Outlet Plate 05MM-WP61

The 05MM-WP61 is a large bullnose outlet plate with a detachable nose in the case of flush installations. This unit can help you efficiently run cables through a wall, with a large opening accommodating several cables simultaneously while keeping things neat and organised. The WP61 allows you to run AV, data and TV cables directly between the source and display. It is perfect for use with our RP01, 2 and 3 series recessed wall points to connect wall-mounted TVs with your entertainment system.

Features and Benefits

- » Bull nose cable management solution for computer networks, home theatre systems
- » Cabling remains neat, tidy and secure via the cable management push through system
- » Large opening which can accommodate a large run of cables at once
- » Easy to run cables through the wall
- » Also available in black (05MM-WP61B)
- » Detachable nose for flush installations
