

1.6m Curved Fascia Mount (200mm Protrusion)

11MM-HS63

The HS63 is a 1.6m one-piece curved fascia mount. The HS63 is an extremely popular bracket size for standard antenna installations, providing enough height for most antennas while remaining discrete. Made from hot-dipped galvanised steel, the HS63 is extremely durable and designed for use in harsh Australian environments—quick and easy installation via pre-drilled holes and slotted fastening points in the mounting plate.

Features and Benefits

- » Made from hot-dipped galvanised steel for durability and long-life use.
- » 200mm depth from fascia mounting plate to clear standard gutters
- » Popular height for optimal antenna positioning
- » Quick and easy installation by pre-drilled holes and slotted fastening points
- » Strong and sturdy design for maximum durability
