

1.8m Curved Fascia Mount (200mm Protrusion)

11MM-HS72

The HS72 is a 1.8m one-piece curved fascia mount. The HS72 can be easily cut down to shorter heights required for a more discrete installation making it an excellent universal option to keep in your vehicle. Constructed from hot-dipped galvanised steel, the HS72 is extremely durable and designed for use in harsh Australian environments—quick and easy installation via pre-drilled holes and slotted fastening points in the mounting plate.

Features and Benefits

- » Made from hot-dipped galvanised steel for durability and long-life use.
- » 200mm depth from fascia mounting plate to clear standard gutters
- » 1.8m height for optimal antenna positioning
- » Quick and easy installation by pre-drilled holes and slotted fastening points
- » Strong and sturdy design for maximum durability
