

WIRELESS SWITCHES

RBC-XL

The RBC-XL kit provides a quick and easy solution in bathrooms, when there is not enough switch wires or when it would be too disruptive or costly to install them. The kit consists of a 3 gang wireless switch and two wireless receiving controllers. The RBC323 wireless switch requires no batteries or ongoing maintenance. It can be installed almost anywhere and is IP67 rated. The keys of the RBC323 are laser engraved. The RBC414 controller has two switching channels, one for the light and the other for the fan. The RBC410 controller has a single higher rated switching channel and is suitable for controlling the heat lamps. The switch and the controllers come already paired, so the whole installation should take less than 15 minutes.

Specification :

Switch Supply - Self generating
RF Frequency - 433MHz
