## RBC101

The RBC101 wireless switch mechanism from Revolution Building Controls will truly revolutionise the way we switch and dim.

The RBC101 requires no batteries or ongoing maintenance. It's speed of installation provides huge labour savings and increased productivity.

You can install the RBC101 virtually anywhere you like, without any negative impact on the decorating.

Up to 10 RBC101's can be paired with one controller for multi-way switching and dimming. You can also pair one RBC101 with several controllers to switch and dim multiple loads simultaneously.

Revolution Building Controls can assist in selecting the right lighting controls for any application.
