Service Boxes
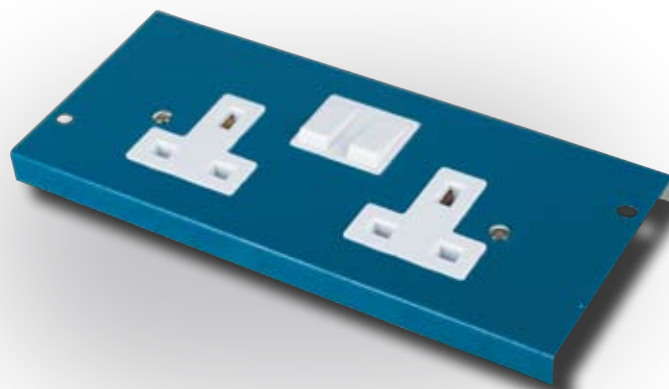

A range of sevice plates are available that can fit into Tamlex service boxes. Plates are manufactured in plastic coated steel (blue) with folded edges to give additional strength. The shallow cavity and screeded service boxes should only be fitted with flush / panel mounted sockets (C2GS) due to the limited depth.
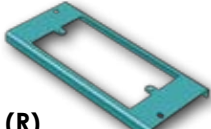

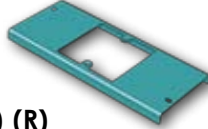

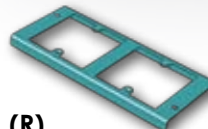

**(X)** DO NOT USE PLATES IN 68mm DEEP BOXES WHEN FITTING POWER ACCESSORIES.

Data and telecom sockets from the RPP Easy Clip range can be fitted into plates marked **(R)** with the use of a DE319 or DE320.
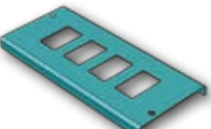

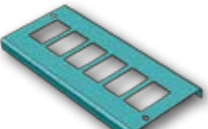

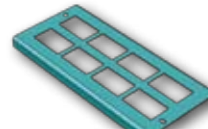

For use in CSB4/SL box only.
