TIS 888 Tone Generator

The TIS 888 is a Tone Generator, Cable Tracker & Continuity Tester. The instrument allows testing of continuity of cables and wires. It is possible to track cables or wires & diagnose the breaking point. It receives the tone signal on cables / wires (telephone lines) and can check the condition of a working telephone line; clear, ringing / busy. The TIS 888 sends a single solid or a dual alternating tone and comes complete with a padded case.

Specification	Receive Frequency 100kHz ~ 300KHz Send Tone Frequency 1.5kHz
Special Functions	Test continuity of cables or wires Tracks cables or wires and diagnoses the breaking point Receives the tone signal on cables / wires (telephone line) Identifies the state in a working telephone line (clear, ringing, busy) Sends a single solid tone or dual alternating tone
General	Batteries: 2x6F22 9V Complete with Soft Pouch
