Rev: 3.0

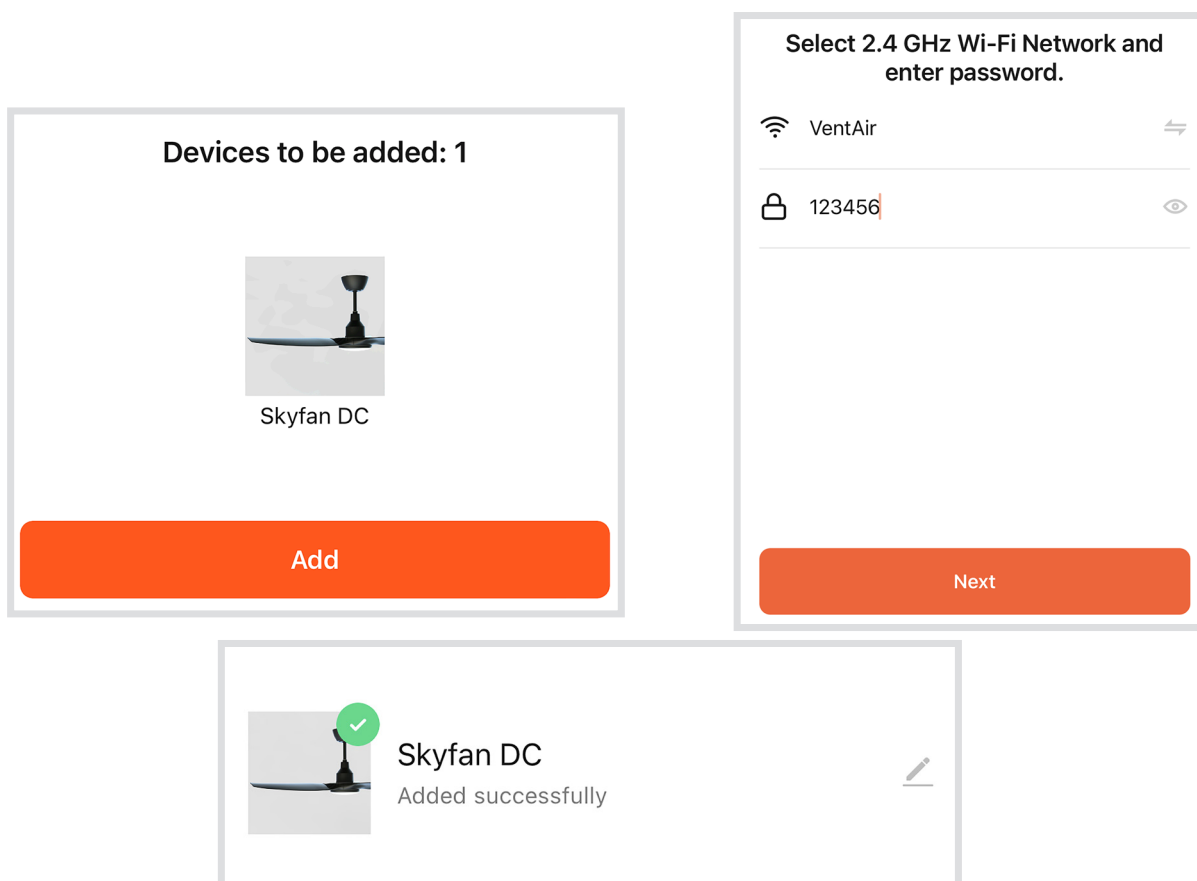

Installation

1. Isolate power to the fan.
2. Twist fan canopy in clockwise position to drop it down.
3. Remove orange rubber cover from app control slot on Skyfan receiver box as shown below.
4. Insert SKYAPPCM module.
5. Replace canopy by sliding upward and re-fix by twisting anti clockwise.

Quick Pairing (on supported hardware)

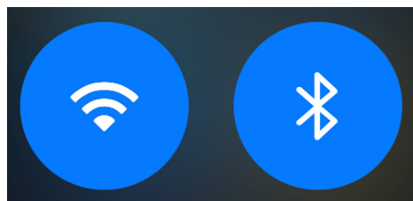

1. Follow steps 1 to 4 below and launch Tuya App.
2. A notification will show on your phone screen asking you to add your device. Press **"Add"**.
3. Connect to a compatible 2.4Ghz Network when prompted.

Standard Pairing:

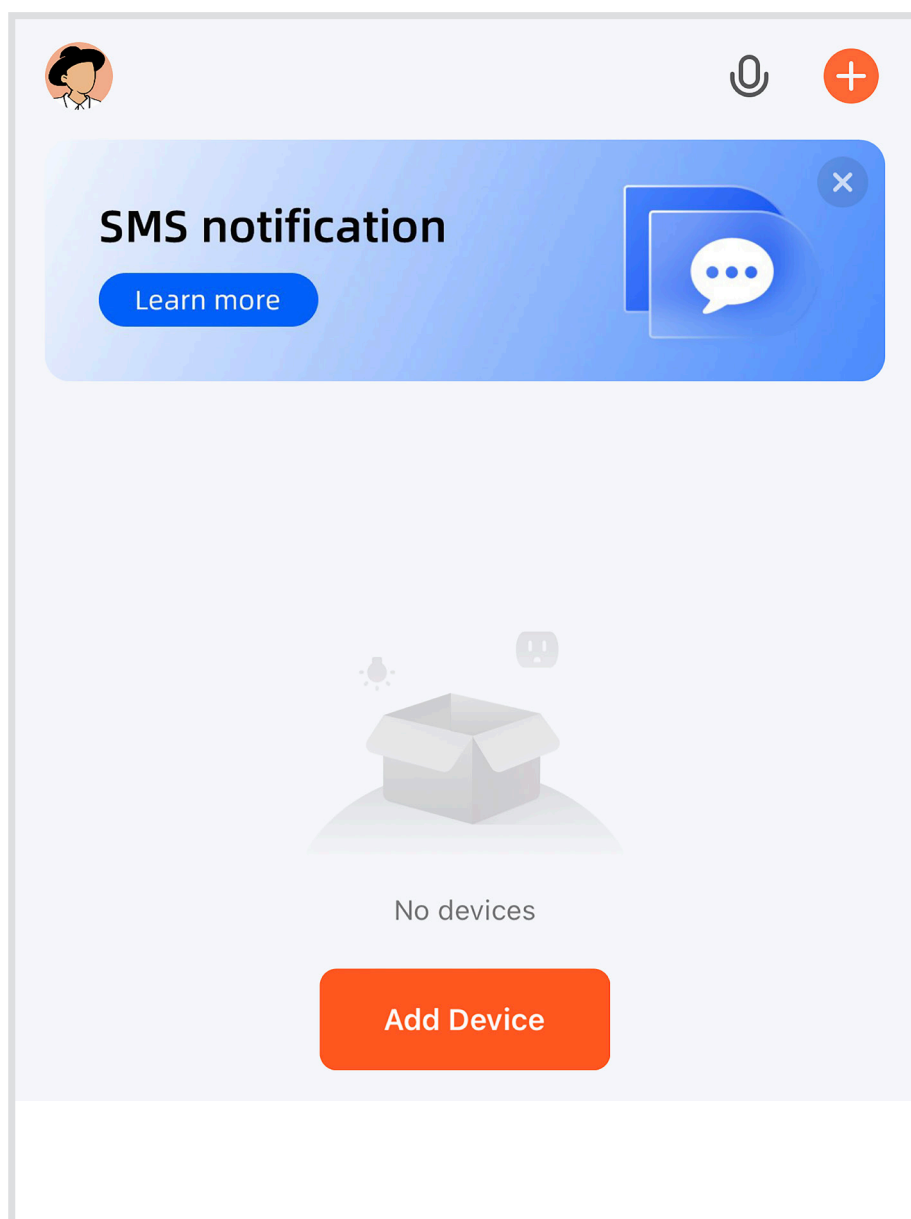

Phone setup & Pairing Instructions

1. Enable **Wi-Fi & Bluetooth** on your phone and allow any Tuya permission requests.

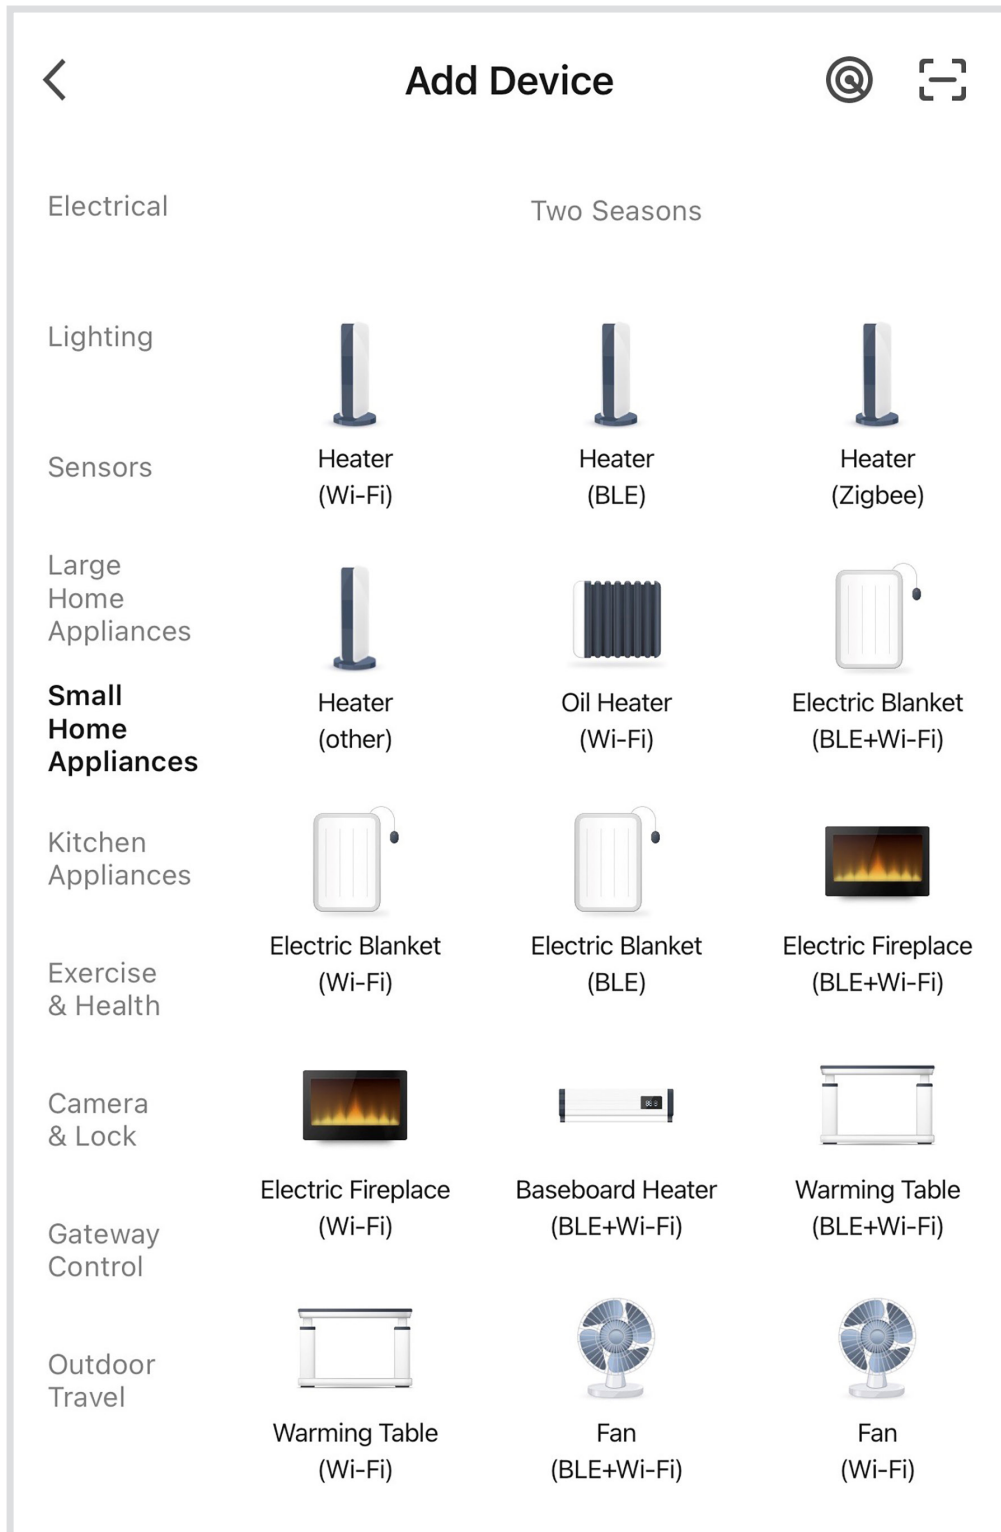

2. Connect phone to desired network (**Ensure this is a 2.4GHz Wi-Fi connection**).
3. Download "**Tuya Smart**" app from App Store (iOS) or Google Play (Android). Also compatible with Smart Life app.
4. **Register / Sign up** for your Tuya account. Follow prompts using an email address.

5. Launch the Tuya application (allow any permission requests) select the **+** (**plus**) symbol located in the top right corner, then select **"add device"**.

6. Under 'small home appliances' select **"Fan (Wi-Fi)"**.

7. Enter 2.4GHz Wi-Fi details and press next.

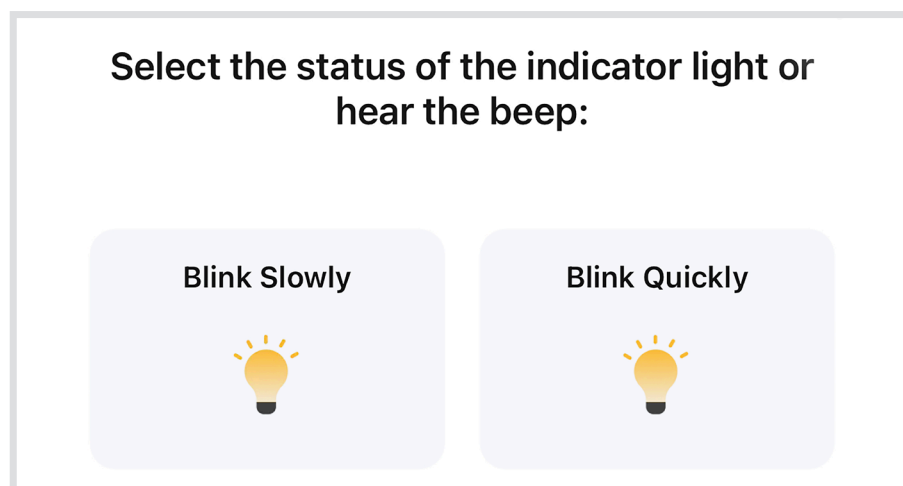

Select 2.4 GHz Wi-Fi Network and enter password.

Next

8. Turn isolation switch off for a minimum of one minute.
9. Turn isolation switch on, within 10 seconds hold the **"TIMER"** button on fan remote for 3-5 seconds.
 - Skyfan without light will emit a "beep-beep" sound indicating it is ready to pair (fan light will also flash on with light models).
10. Confirm the indicator is "blinking quickly" Device will now begin a two-minute countdown and search for fan.

Fan Functions:

Linking with Third-Party Voice Services

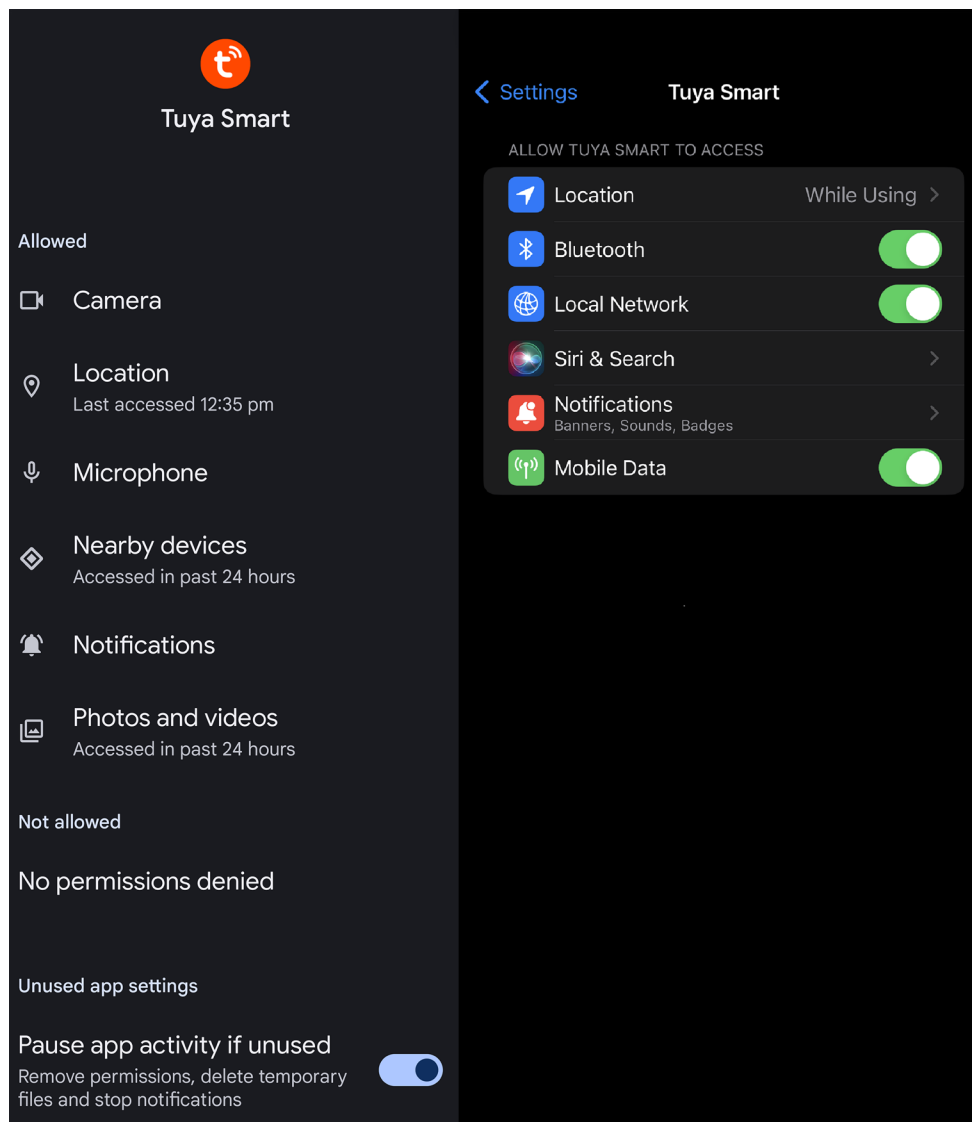

Use your voice to control your fan (requires compatible device).

1. Tap the "Me" icon on the bottom left of your Tuya app.
2. Under "Third-Party Voice Services" select "Google Assistant".
3. Select "Link with Google Assistant"
4. Select "Agree and link".

Troubleshooting

- Refer to the 'Preparing your mobile phone & resetting the fan for pairing' instructions and repeat steps 5-12 and choose 'blinking slowly' instead of "blinking fast".
- Ensure you are connected to a dedicated 2.4GHz network (combined 2.4 and 5GHz networks are not supported).
- If pairing fails, see step 9 and this time, give the timer button one quick press then press and hold for 3-5 seconds, unit will emit a beep-beep sound if successful.

- Exit Tuya app and ensure all permissions have been granted / enabled (process will vary depending on phone model and software version).
